### TECHNICAL SKILLS

REACT NATIVE

REST API

REACT JS

JAVA SCRIPT

HTML & CSS

PYTHON

### ADDITIONAL SKILLS

MICROSOFT EXCEL VBA

BLENDER

### LANGUAGES KNOWN

- ENGLISH  
Advanced Proficiency
- TAMIL  
Full Professional Proficiency

## SUMMARY

I have 5 months of experience working in a Selsons Software Solution as a Software Application Developer, where I independently completed two full applications. I am skilled in developing mobile applications using React Native, including designing user interfaces, integrating APIs, and implementing advanced features. I am confident in delivering fully functional, user-friendly apps and handling complete development cycles.

## EXPERIENCE

### Software Application Developer

**Selsons Software Solution** 10/2024 - Current  
**Staff Management App for Annai Anbalayaa Trust**  
11/2024 - Current

- Developed a staff management app exclusively for Android for the Annai Anbalayaa Trust, enabling staff to log in, view and receive tasks, and track their attendance and performance.
- Integrated an API to assign tasks from the admin panel to individual staff members, displaying the work assigned to each staff member on their dashboard.
- Implemented a direct calling feature where staff could click a call button to dial a number. The app tracks the call status and saves the call details for history display.
- Utilized time-tracking features to calculate and display attendance details, including working hours from login to logout.
- Developed salary calculation functionality based on attendance and work performed, displaying staff salaries in the app.
- Integrated payslip generation, allowing staff to view and download their payslips directly from the app.
- Built the app using React Native, ensuring a smooth and efficient user experience with seamless communication between the frontend and backend.
- Platform: The app is designed specifically for Android devices, ensuring compatibility and performance on that platform.

### Technologies Used:

- React Native, JavaScript, REST API, Firebase, AsyncStorage

## **Donor App for Annai Anbalayaa Trust**

**10/2024 - 11/2024**

- Developed a donor app for the Annai Anbalayaa trust, allowing users to easily register, log in, donate, and view payment history.
- Integrated the PhonePe SDK for seamless payment processing, enabling users to make donations securely.
- Enabled users to check their donation history and track contributions to the trust's activities, ensuring transparency and engagement.
- Implemented features for prayer request submission, volunteer options, and event participation, offering users multiple ways to connect with the trust's community.
- Developed a profile update feature, allowing users to maintain and modify their personal details directly within the app.
- Utilized Firebase for sending push notifications, keeping users informed about updates, new events, and important activities related to the trust.
- Ensured a smooth user experience with intuitive interfaces and seamless backend communication, providing a seamless experience across devices.
- Platform: The app is available for both Android and iOS platforms, ensuring accessibility to a wider audience.

### **Technologies Used:**

- React Native, JavaScript, PhonePe SDK, Firebase, REST API, AsyncStorage

## **Animated Website**

**03/2024 - 03/2024**

- This is a My College Symposium Animation Website is a platform designed to showcase and promote symposium events through engaging animations. It aims to provide an interactive and visually appealing experience for both organizers and participants.
